4 Services that can **boost the immunity of your Cyber Security posture**

SYNOPTIQ
Infosolutions

SECURITY AND INFRASTRUCTURE SOLUTIONS.
FOR NON-STOP BUSINESS.

You have protected everything.

Yet you have sleepless nights. Because every system is vulnerable.

76% of all organisations that were breached last year already had an active Vulnerability Assessment and Penetration Testing program!

Synoptiq & Infosec Ventures bring to you 4 Services that you should surely evaluate to boost your Cyber Security Immunity.

1

DMARC Dashboard

Helps to align your own DAMRC and understand shadow IT. Gives clear evidence whether your domain has been spoofed or not.

2

Phishing Simulations

Helps determine employee awareness and preparedness index against phishing attacks.

3

Attack Surface Management

Helps in finding existing vulnerabilities which can be seen from outside to any hacker in the world.

4

Business Critical Bugs

Identify and mitigate system vulnerabilities that may cause a breach which will harm your business

- Mitigate spoofing
- Enhance deliverability
- Move to Reject mode in a more efficient manner

DMARC Dashboard

1

2

Phishing Simulations

- 91% of all Cyber Attacks start with Phishing – Gartner
- Post-delivery security of emails

Attack Surface Management

Details in next slide

3

- Helps in finding vulnerabilities which can be seen from outside to any hacker in the world.
- Security Risk Rating

4

Identify Business Critical Bugs

Details in next slide

- Focuses on Business Impact
- 32 Hall of Fame hackers
- Pay only if vulnerabilities found

Attack Surface Management

CXO Report - This is a management level report which provides a high-level overview of the key risk factors divided into 7 broad categories

- SSL Misconfiguration
- Vulnerable Network Services
- Web Application with Vulnerable Products
- Missing Security Headers
- DNS Health
- Information Leak
- IP Reputation

DTR Report - This report provides an in-depth breakdown of the vulnerabilities discovered across the public-facing assets of the organization along with their description and patch recommendations.

This is a 7-day activity where the BugsBounty.com team of 32 hackers will try and penetrate every infrastructure component that you have and tell you where the gaps are in Applications, Code, Infrastructure, Network, Web, Social and mobility.

3 types of reports will be shared with you and on-going patching will keep on being advised.

The biggest selling point of this is that if we do not find any business-critical vulnerability, you don't pay us.

The hit ratio of this team is 100%!

Identify Business Critical Bugs
