

INFRASTRUCTURE AND SECURITY SOLUTIONS.
FOR NON-STOP BUSINESS.

BACKUP FOR NUTANIX

AN APPROACH DOCUMENT

Common Misconception

MYTH

We do not need a dedicated backup solution if we have deployed Nutanix HCI Solution

REALITY

Simplicity is lost. And even if you are using a legacy backup solution, it is not integrated with Nutanix Native Operating platform for performance.

What should a Nutanix backup solution have

Single click
backups

Native Nutanix
look and feel

100% restoration
promise

100%
application
focus

Automate
application
specific
recovery
workflows

Ability to
backup from
on-premise to
cloud

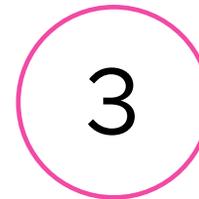

Introducing HYCU

Purpose-built backup and recovery for Nutanix

Thousands of Nutanix users in more than 70 countries use HYCU as their preferred complete backup solution for Nutanix Enterprise Cloud

Minutes to **Learn**

Minutes to **Deploy**

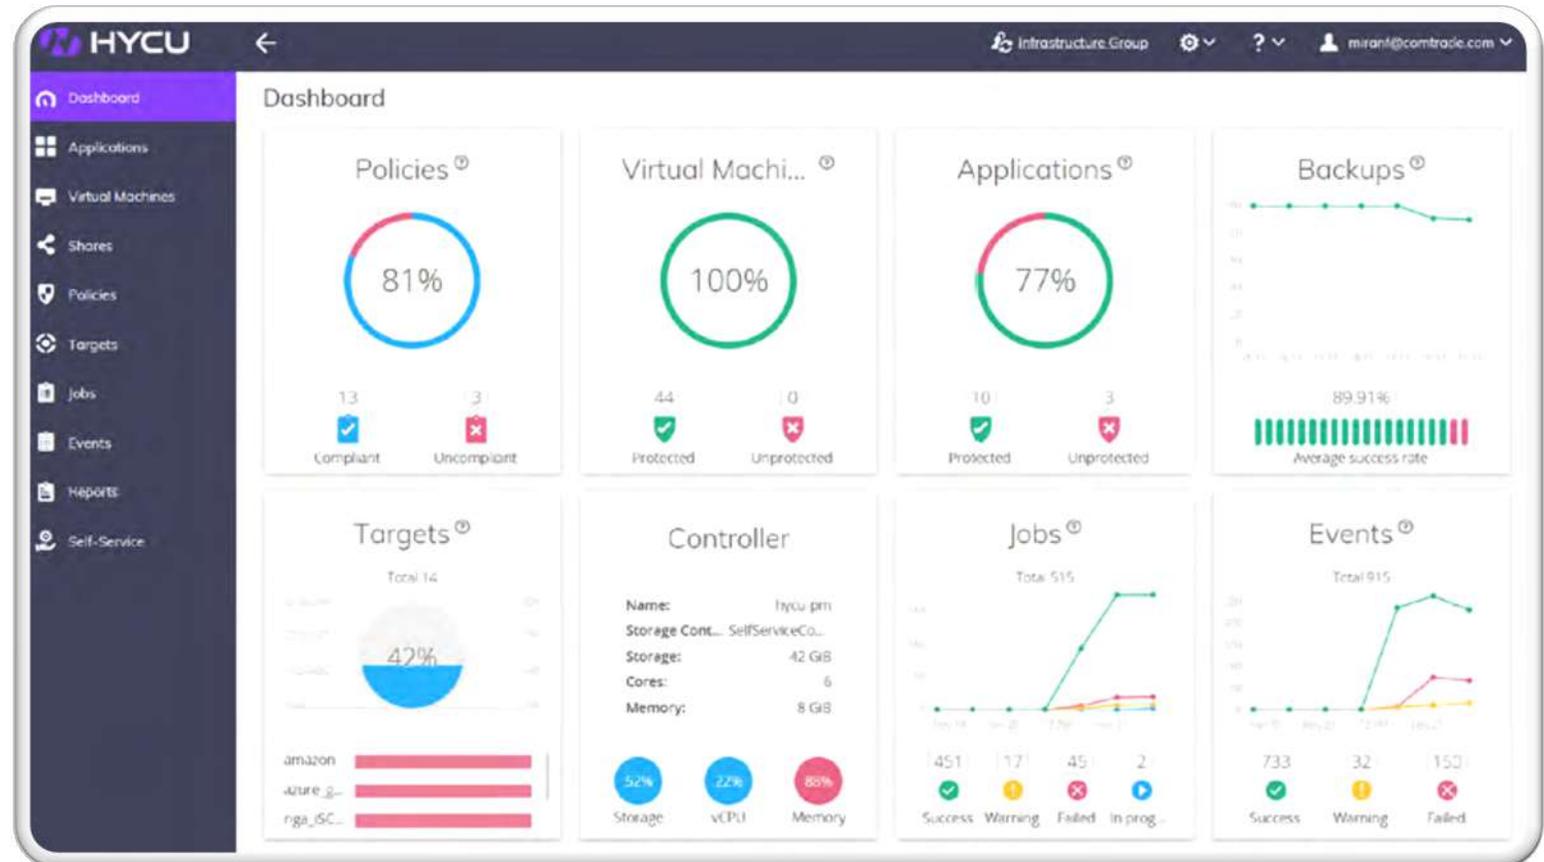

Minutes to **Recover**

Hycu Differentiators

1. HYCU is an integrated package that **runs as a service right on your Nutanix.**
2. Unlike traditional legacy backup solutions, **there are no hidden additional Windows Server, Database and anti-virus licensing costs.**
3. And there are **no professional services** required.
4. With HYCU, a pure software solution, **you don't need separate infrastructure to run your backup software** and don't require separate infrastructure for fast recovery.

Hycu Differentiators

90% faster file-share (Nutanix Files) backup that is impact free and agentless

Software only solution that **runs right on your Nutanix cluster**

Prism like look & feel and a hypervisor-agnostic architecture to protect Nutanix and non-Nutanix virtualized environments

WAN-free backup for Remote Office Branch Office (ROBO) sites eliminates WAN network bandwidth by nearly 50%

Application aware storage level snapshots not just for efficient backup, but also for rapid, infrastructure free recovery

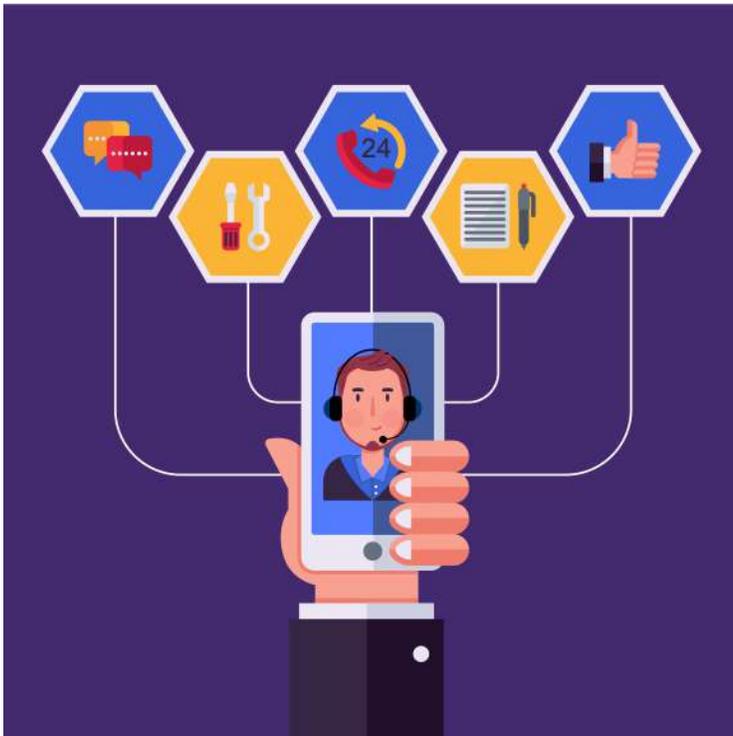

Automated, **config-free application discovery**, application aware backup and application aware recovery

Full deployment of HYCU right from Nutanix **CALM Marketplace**

We can help you

Synoptiq can help you deploy these best of breed solutions coupled with continuous support for the whole stack.

Write to us today!

THANK YOU!
